

Native SAP NetWeaver Integration ...

SKYVVA NetWeaver Pack

SKYVVA' s NetWeaver Pack is a natively NetWeaver – Process Integration PI - built and powered Integration Solution for integrating Salesforce into any kind of On Premise packaged/custom-built Business Application, Databases and Flat Files.

SKYVVA covers scheduled and real-time Integration Patterns and in-/outbound, synchronous/asynchronous Integration Scenarios.

The SKYVVA NetWeaver Pack has been designed to enable NetWeaver Process Integration for Salesforce Integration.

Enhancements such as Monitoring and Messaging Services have been implemented on the salesforce.com Cloud Platform force.com.

Features & Benefits

100 % SAP NetWeaver Compliance

Business Agility & Fast Process Innovation

A hybrid deployment model enables high Process Flexibility and a fast Adaptation of Business Models

Enterprise Level Management Environment

End2end Integration Process Visibility
Pro active, exception based alerting, high security & scalability

Unmatched Cost Efficiency

No need for a 3 rd party Middleware or Cloud Infrastructure
Low maintenance cost, low TCO

Subscription Flat

No hidden Costs – No Surprises

Pre-built Integration Templates consisting of Mappings – Data Transformations – Workflows are powered by NetWeaver Process Integration. Integration Templates easily align salesforce.com’s Sales & Service Cloud , Custom Clouds and ISV partners’ Apps with any kind of On Premise Business Application, Databases or Flat Files. Templates can be customized to specific process requirements. Access to Salesforce is managed by SKYVVA’s Session Management component.

Hybrid Deployment Option

Integration Services can be deployed in a hybrid mode and distributed over a Cloud- & On Premise Platform depending on Integration Strategy and Business Requirements (Mix & Match Flexibility).

In a hybrid deployment environment, Salesforce.com’s Cloud Platform force.com acts as a kind of Agility Layer to NetWeaver.
