

Take Data Migration to the Cloud ...

SKYVVA Integration Suite Starter Edition

SKYVVA' s Data Migration Service for Salesforce is the **1st** 100 % natively force.com built Data Migration App designed to migrate data via a manual file upload.

As a true Cloud Service data can be uploaded over the Web without the need to install any software.

SKYVVA' s Data Migration Service is perfectly suited for business analysts and administrators to manage the import of critical business information such as accounts, contacts, products, leads and orders in a timely manner without being reliant on limited IT resources. This helps streamlining operations and unlocking the power of Salesforce.

Features & Benefits

Business has control over Data

Minimize dependency on limited IT resources

Salesforce Look & Feel

Ease-of-use: set up, configuration and operation

Going beyond Data Loader

Get visual Mapping/Monitoring and Re Processing Services

Operational Efficiencies

Accelerate time-to-results: timely processing of new leads, account and contact information and other key business data

Professional Edition Support

Support & Sandbox included

FREE
No Limits – No hidden Cost

As the SKYVVA Migration Service is a native force.com App, no hardware or infrastructure is required to install or maintain. Based on an intuitive (Salesforce Look & Feel) Web interface SKYVVA's Data Migration Services are very easy to configure (No Coding) and maintain. Data Migration Services are installed as a tab "Integration" directly into Salesforce for easy access and convenience. Aloha status avoids consuming a Salesforce tab.

Fields are mapped by a visual editor, data are transformed using a formula editor. All operations are executed in the familiar Salesforce Look & Feel. Business analysts or administrators get alerted about failures in the service and are enabled to resolute data transformation or process logic issues without IT help via a message board.

The STARTER Edition can be upgraded by a click to ADVANCED or UNLIMITED Edition.

Key Features	Benefit
Drag & Drop Mapping	Intuitive editor to map source and target fields
Import Maps	Re-use existing APEX Data Loader
Message Re-Processing	Avoids time-consuming Re-Setups
